DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1751

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glenn, Jr. et al (6,277,797).

Glenn, Jr. et al disclose a skin cleansing composition comprising 0.5 to 10 parts by weight of a fumed silica produced by the vapor phase hydrolysis of silicone tetrachloride in a hydrogen oxygen flame (col. 4, lines 14-17) and has a particle size of 0.1 to 100 microns with a surface area of greater than 50 m²/gram (col. 4, lines 30-43). Glenn, Jr. et al further teach the inclusion of 5 to 30 parts by weight of a surfactant system comprising anionic, nonionic and cationic surfactants (col. 10, lines 45-col. 12, line 41). With respect to the water content, Glenn, Jr. et al teach that water may be included in an amount from 30 to 80 parts by weight (col. 12, lines 44-51). Glenn, Jr. et al further teach the inclusion of polyhydric alcohols and ethers, polyoxyethylene esters of fatty acids (col. 12, lines 20-24 and col. 13, lines 5-26).

Glenn, Jr. et al lack a specific teaching in an example of each of the claimed components.

It would have been obvious to one of ordinary skill in the art to combine the components of Glenn, Jr. et al to specifically teach the claimed composition because each of the claimed components are taught in their requisite proportions and one skilled in the art, in the absence a showing to the contrary, would have been motivated to

specifically teach the claimed compositions. Moreover, A reference may be relied upon for all that it would have reasonably suggested to one having ordinary skill the art, including nonpreferred embodiments. Merck & Co. v. Biocraft Laboratories, 874 F.2d 804, 10 USPQ2d 1843 (Fed. Cir.), cert. denied, 493 U.S. 975 (1989). See also Celeritas Technologies Ltd. v. Rockwell International Corp., 150 F.3d 1354, 1361, 47 USPQ2d 1516, 1522-23 (Fed. Cir.1998).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Necholus Ogden whose telephone number is 703-308-3732. The examiner can normally be reached on Monday-Thursday.
